

# Oil and gas industry

flybmi has proven experience in the planning, execution and management of air charter for the oil and gas industry.

The oil and gas industry needs to ship teams of people where they are required day or night. However, crew exchanges are often required in remote areas, so moving oil and gas crew can be challenging if not handled by an experienced team.

flybmi offers a cost-effective, fast and reliable option for delivery of personnel to your locations. Our Embraer aircraft give us the ability to fly into airports and runways that are much closer to your drill site or service location. We tailor your solution to match your needs and can arrange every aspect of the journey from reservations, passenger manifest, check-in arrangements, security or even special baggage requirements.

We work with a number of top oil and gas industry clients, offering tailor-made solutions and delivering significant savings in both costs and time. flybmi conforms to the highest standards of operations, crewing and engineering, as well as offering a great inflight experience.

## Our expertise

We provide an experienced crew and an aircraft that has the robustness of the flybmi operational capability as standard:

- flybmi is fully accredited under the IATA Operational Safety Audit (IOSA) Programme
- All flybmi crew are EASA licensed
- All flybmi crew and aircraft are CAT II capable.

Working with flybmi means you receive the perfect solution for your crew change movement:

- A professional crew, operational excellence and the standards you would expect from an airline with a 70 year heritage
- A brand with pedigree that gives you assurance.

## Our fleet

We operate two Embraer models:

- 14 Embraer 145 with 49 seats
- 4 Embraer 135 with 37 seats

We can offer a choice of “white tail”, flybmi branded or your own livery on the aircraft.

Each aircraft has the following as standard:

- Integrated airstairs, for convenient airport handling
- A full galley, including hot ovens for your usual onboard service
- An all leather interior for added comfort.
